

British Berkefeld Ceramic Candle Filter

Product description

7" long x 2" diameter Ceramic Candle Filter on 36mm long threaded mount, complete with 7mm thick washer and wing-nut. Replacement candle for Gravity Filter models SS2, 3 or 4, LP2, Household Filter Kit or Cleanwater Bag filter.

Can also be used in most other 2 container Gravity Filters where the connecting hole diameter is approx ½" (13mm) between the top reservoir and dispensing container.

Ceramic Candle performance

The **British Berkefeld® Sterasyl™** ceramic candle removes suspended solids from water, turbidity, water borne cysts (Cryptosporidium, Giardia) and pathogenic bacteria (E-coli, Cholera, Typhoid, Shigella, Klebsiella Terrigena) **>99.99% at 0.9 microns**. The ceramic candle is impregnated with silver to inhibit microbiological growth, giving the candles self-sterilizing properties and removes the need for regular boiling. British Berkefeld® ceramics are made from 100% natural diatomaceous earth (a microscopic labyrinth of silica).

On average a **SterasyI™ ceramic filter will last for 12 months* (10,000 litres)***, depending on the frequency of use and the turbidity of the water being filtered. For cleaning, it only requires a mildly abrasive cloth and water (no chemical needed). Number of times depends on how much ceramic is removed during each cleaning process; guideline is 50 + times.

*Guideline only as dependent on water quality

Contaminant Removal (quick reference)

Sterasyt: Pathogenic Bacteria, Water Borne Cysts, Suspended solids and turbidity

Super Sterasyt: All that Sterasyt removes plus objectionable tastes, odours, trace organics and chlorine

ATC Super Sterasyt: All that Super Sterasyt removes plus toxic lead

Sterapure: All that Sterasyt removes plus Virus – Poliovirus, Rotavirus and MS2

Minimum Box Information

Box Quantity per candle grade is 25

Box dimension per candle grade: 31 x 31 x 32 cms.

Gross weight for 25 x 7" Sterasyt: 6 kgs.

Gross weight for 25 x 7" Super Sterasyt: 7 kgs

Gross weight for 25 x 7" ATC Super Sterasyt: 8 kgs
